

THE PD TRAVEL CHECKLIST

In addition to the regular items that you usually take (e.g., clothes, toiletries, books) here is a checklist to help you with your PD packing:

TO DO BEFORE LEAVING:

- Confirm with your destination that your supplies have arrived
- Gather a list of contact numbers: Baxter, your clinician, etc.
- Understand if your supplies will be delivered directly to your lodging destination, or if they need to be picked up by you at the airport

SUPPLIES TO TAKE WITH YOU:

- PD cyclers, if needed
- Transformers and power adapters for international travel, if needed
- Medications: Non-Baxter medications needed for your trip should be in their original packaging
- PD supplies, dressings and medication supplies: Please ensure you take all small items you will require for your treatment, as these are sometimes not shipped; review your supply list to be sure
- Amia** Automated Peritoneal Dialysis (APD) Cycler Cassettes and Supplies: You may need to take your **Amia** APD Cycler cassettes and supplies with you depending on the destination. Check with your Global Travel Club Specialist

DOCUMENTS TO TAKE WITH YOU:

- You **MUST** carry your “Doctor’s Letter” outlining your condition, in order to travel. This letter will also be required at Customs and Immigration, if you plan on international travel
- Copy of prescriptions
- Baxter’s order confirmation
- Homechoice** APD Cycler or **Amia** APD Cycler “Device Travel Letter”
